

“Wrestling Show Booking”

Introduction

- We have planned of developing an online Wrestling Show booking system for Wrestling Promotion.
- The main objective of developing this project is that many people like Entertainment to reach their Home in easier Way .In order to make this whole process faster we are developing this project.
- This website will allow customers to Sign Up with username and password, using which they can login into the system. Once user is logged in he/she can select the type of PayPerView/Specials he/she wants to book.
- One Customer will be allowed to book more than one PayPerView/Specials.
- Admin will have to login separately.
- Admin will be allowed to Superwise the Data and Make necessary Changes

Table Structure

customer :

Field name	Types	Description
id(Primary Key)	Int()	ID of the user
username	Varchar()	Name of the user
password	Varchar()	Password of user
email	Varchar()	Email of user
user_type	Varchar()	Types of user's(user/admin)

There will be two types of user, admin and customers. In our system there will be only one admin(staff), so we will be storing it only in one table and we have kept single username, password in this table for the admin.

show:

Field name	Types	Description
sid(Primary Key)	Int()	ID of the Show
sname	Varchar()	Name of the Show
sprice(Unique)	Int()	Price of the Show
